

Systems Engineering student with a focus on Full-Stack software development, experience building REST APIs, web applications, and relational database solutions.

I have worked with SpringBoot, Flask, React, PHP, Python, Java and SQL, developing academic and personal projects published on GitHub.

I stand out for my logical thinking, complex problem solving, teamwork and fast learning of new technologies. I seek to contribute clean code, scalable solutions and good engineering practices.

ACADEMIC EDUCATION

2026 Systems Engineering

Universidad El Bosque 7th semester in progress

2026 Extracurricular Activities

- Competitive programming
 - 1st place - 4th Internal Programming Marathon 2025, Universidad El Bosque
 - 2nd place - CCPL 2024-R7, Bosque
 - 2nd place - CCPL 2025-R4, Católica
 - 51st place - ICPC 2025, Colombia (National)
- Peer tutor
 - Programming tutoring for students from lower semesters

2022 High School Diploma

Liceo Hermano Miguel La Salle

WORK EXPERIENCE

2023 Mercado Libre

Participation in the Mi Primera Experiencia MELI (vacation program).

SKILLS

- Backend - Python, Java, PHP, TypeScript, Go, APIs
- Frontend - React, HTML, CSS, JavaScript
- Databases - MySQL, PostgreSQL
- Tools - Git, Github, Linux, AWS
- Complex problem solving
- Leadership and teamwork
- Solution documentation
- Assertive communication and empathy
- English proficiency
